THE PENINSULA YACHT CLUB

Lift and Port Installation/Maintenance Policy

If you install a lift or port in the marina at The Peninsula Yacht Club you must first have the approval from the Marina Manager or General Manager.

It is the member's responsibility to consult the lift provider to discuss all the factors that go into selecting the right lift/port. For example, water depth (taking into consideration low water conditions, Lake Norman can fluctuate as much as 8', or more, below full pond), weight distribution, dock bracing and much more. Consult your provider with any other questions.

Routine/Annual maintenance **must be done** as your lift company recommends.

Any damage or modification to the dock caused by the lift/port is the responsibility of the member/owner and will be fixed at the member's expense. The slip must be brought back to its original state after use.

I will be pu	rchasing or installing a (Lift/Port)	in slip number
